

Why can't I order Polycotton tablecloths wider than 60"?

All Polycotton fabric is currently 60" wide.

As we make all our items from the fabric that is available to us, we can only go up to 60" in width or diameter for Polycotton items.

We do not offer larger sizes with joins, as these would be very prominent and would look awkward as they would usually be on the table top.

If you wish to order a larger dimension, we recommend you choose our [Spectra® Plain fabric](#), which can go up to 110" (280cm) without any joins.
