

Does the length of a runner include the tassels or not?

Whenever we refer to the length of a table runner, we always mean the length from end to end, or from pointed end to pointed end (for pointed-end runners), excluding the length of tassels (in case tassels have been purchased).

Customers are advised to note that the tassels' length is additional to the length of the runner they are ordering, so that they may be able to perform their calculations appropriately for their tables.
