

Your customisation utility says that the product will be made in more than one piece, why?

Our TableShield and Table Guardian rolls come in fixed widths of about 149cm and 139cm respectively.

If the item you are ordering is bigger in both dimensions (or in diameter for circular protectors), it will have to be made in two pieces.

If you wish us to make the two pieces in a specific way (e.g. separate them at a specific length), please [email](#) us and we will advise you of the feasibility of your request.
